

ABOUT THE SPEAKER

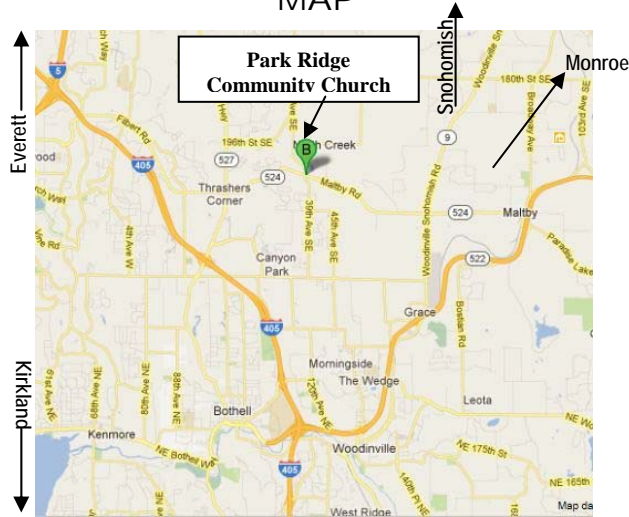

Born and raised in the Seattle area, Dr. Jack Wilson earned his bachelor's degree in Pharmacy from the University of Washington in 1976 and Doctor of Pharmacy from the University of Utah in 1979. He self-financed both degrees.

Jack was a pharmacy practitioner, hospital pharmacy administrator and college educator over a 17 year period before founding a medical device company around his patented inventions in 1990. Dr. Wilson launched several businesses in the last 20 years and raised tens of millions of dollars through federal grants, industry investors, business-to-business partnerships, venture backers and regional investment bank sources.

In recent years, he learned about college scholarships and grants as his first two of six home-schooled *and* public high school children reached college age. He then applied his business experience and knowledge of fundraising and grant writing to college grants and scholarships. He has taught the subject in Northwest communities since Y2000 young people of all backgrounds in high school/college. Using methods he now teaches in Go To College Free! Seminars and Workshops, his first and second daughters won over \$200,000 combined.

Dr. Wilson is presently involved in two more start ups in the high tech medical industry—both will rely on private and federal grants in early stages.

MAP

DIRECTIONS:
